

Climax Timothy

Timothy is a popular cool season grass for forage mixtures. It is very palatable, and winter hardy. It can be used for any class of livestock, including equine, due to its low dust content.

Due to its growth habit, it is typically used for hay, and rarely for pasture situations. It has a very shallow root system, making it unsuitable for sandy soil or other droughty conditions.

Timothy is a very small seeded, so use just a small amount in mixes.

Seeding Method: Frost seed, Drill, or Broadcast

Seeding Rate: 12-15# mono, 2-4# for mixes & overseeding

Seeding Depth: 1/4"

Seeding Dates: 2/15 - 5/1 or 8/15 - 9/20

Notes: Very small seed!
