

481QC Alfalfa

481QC is meant for producers who want to get as many harvests as possible. 481QC offers solid agronomics, quality and yield potential. It is geared towards haylage or wet bale producers, as it's regrowth is very rapid. The sooner that all traffic can be removed from the field after cutting, the better.

481QC fits a 26-28 day cutting schedule to allow aggressive producers to achieve 5 cuttings per season.

DRI:	33/35	FD:	4.8
Yield:	9.5	WSI:	1.0
Quality:	9.2		

Seeding Method:	Drill
Seeding Rate:	25# pure stand, 12-22# with companions
Seeding Depth:	1/4" - 1/2"
Seeding Dates:	Seeding Dates: 3/15 - 4/20 or 8/25 - 9/20
Notes:	This seed is treated with a fungicide and contains a coating with inoculant.
