

## 421BR Alfalfa

421BR alfalfa is a workhorse variety that can perform well in many conditions! It's branch root architecture allows it to thrive in soils and conditions that most alfalfas cannot tolerate. It has proven itself many times on both heavy clay ground and light sands, as well as anywhere in between!

421BR has excellent agronomics and yield potential and great quality. It can handle most situations that producers want to throw at it!
