

Product Tech Sheet

Fall Feast

Fall Feast is an all brassica blend that is designed to reach its peak appeal in late fall. This mix offers several brassicas to choose from and satisfy multiple appetites.

Fall Feast is easy to establish and manage!

What's In It: Fall Feast contains two types of turnips, two rapes, and a couple hybrid brassicas that are crosses of kale or cabbage.

Site Prep & Planting: Fall Feast prefers to be lightly incorporated or drilled about 1/4" deep; however, it is the best throw and go mix available if you are equipment or time limited!

Maintenance: Fall Feast should have a balanced fertilizer (such as 12-12-12) applied at planting. This mix will winterkill, but will offer nutrition throughout much of the winter as animals dig up the bulbs from below ground!

Seeding Method: Drill or Broadcast & Incorporate

Seeding Rate: 8-10# / acre

Seeding Depth: 1/4"

Seeding Dates: 7/15 - 8/25

Notes: Available in 5# or 25# bags!
