

## 405SC Alfalfa

405SC is a sunken crown variety of alfalfa, meaning that it's growing point stays below the soil surface. This allows it to persist better in situations of high traffic such as fields with lots of wheel traffic, or grazing situations.

405SC has an excellent agronomic package and offers very good yield and quality potential. 405SC is the best variety option for a grazing alfalfa!

<b>DRI:</b>	<b>35/35</b>	<b>FD:</b>	<b>4.0</b>
<b>Yield:</b>	<b>9.0</b>	<b>WSI:</b>	<b>1.6</b>
<b>Quality:</b>	<b>8.9</b>		

<b>Seeding Method:</b>	Drill
<b>Seeding Rate:</b>	25# pure stand, 12-22# with companions
<b>Seeding Depth:</b>	1/4" - 1/2"
<b>Seeding Dates:</b>	Seeding Dates: 3/15 - 4/20 or 8/25 - 9/20
<b>Notes:</b>	This seed is treated with a fungicide and contains a coating with inoculant.
